

*Slnéčné stanovište,
priepustná výživná pôda*

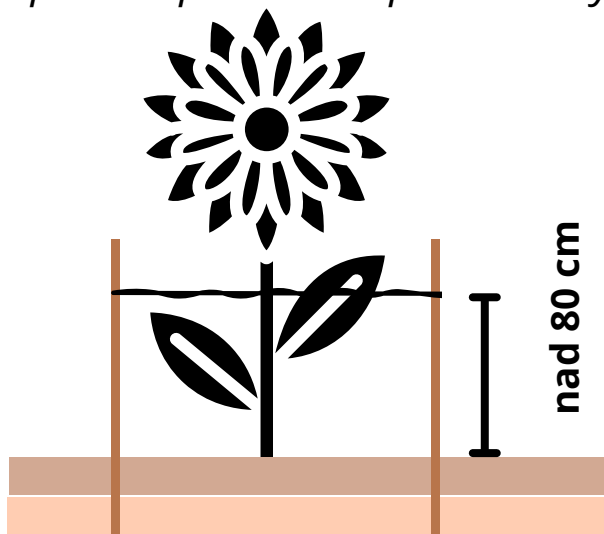

*Hľuza naležato 10 - 12 cm
pod zem + kompost*

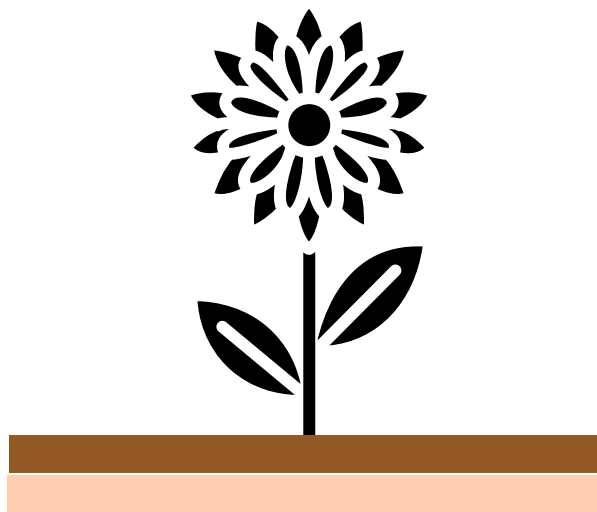

*Výsadba na jar po mrazoch
Spon 35 x 35 cm*

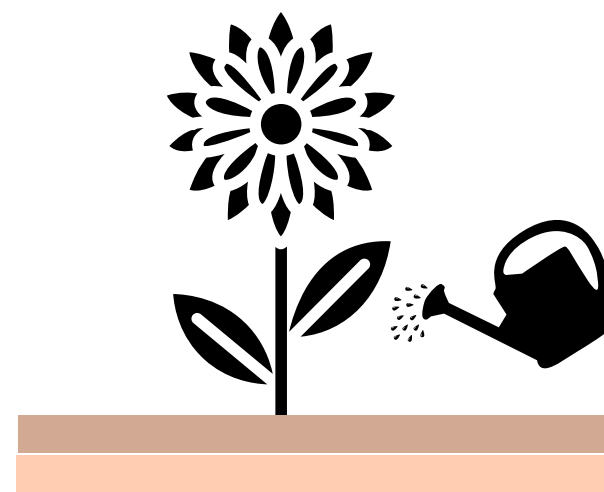

*Opora na spevnenie rastlín -
postačí palice a napnuté drôty*

*Mulčuj pre udržanie vlhkosti.
Pozor na hlodavce!*

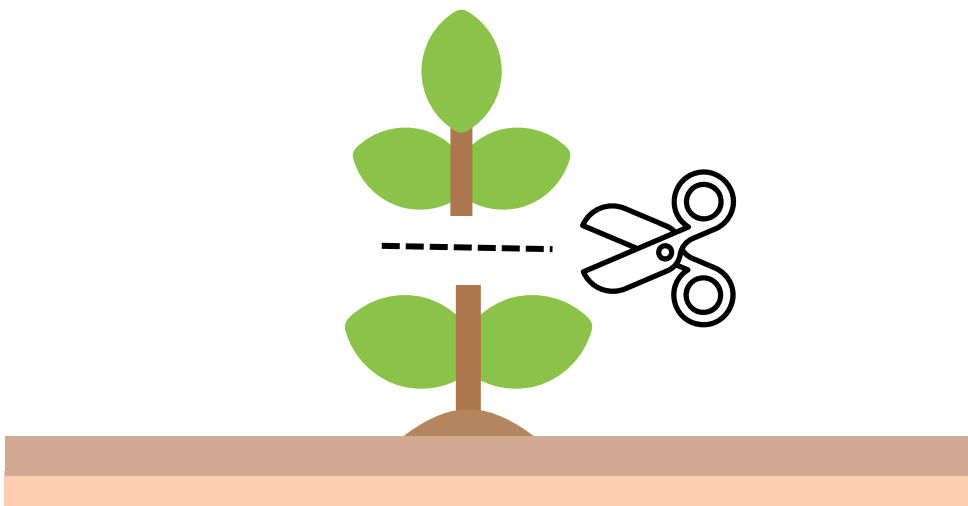

*Zalievaj len pri
dlhodobejšom suchu.*

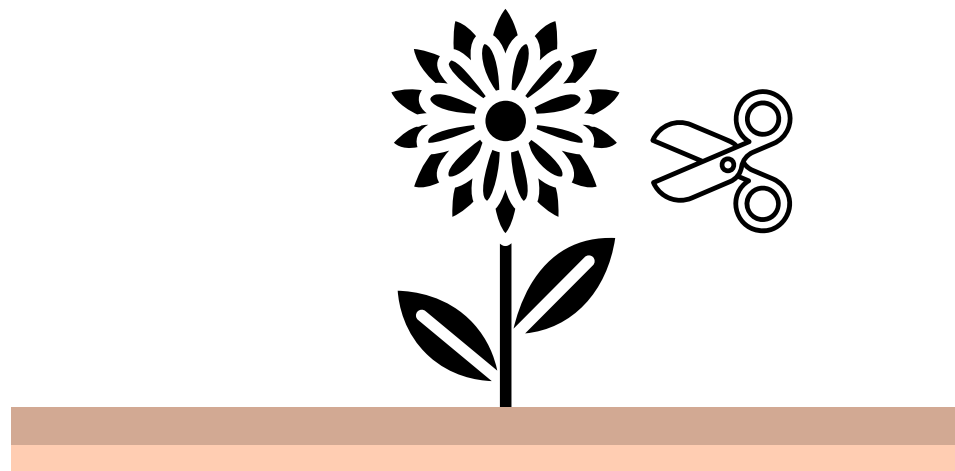

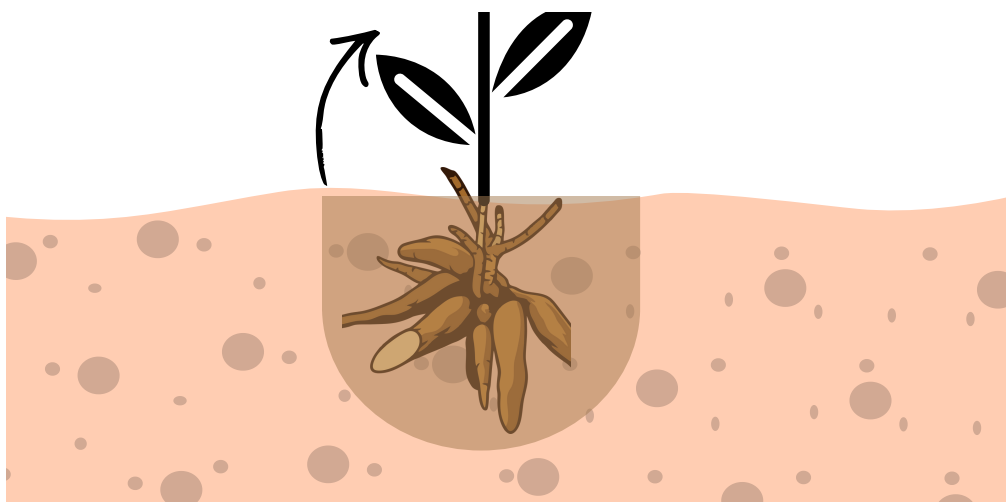

Zaštipuj mladé rastliny za prvou vrstvou listov, po vytvorení druhej vrstvy listov

Pravidelne odstraňuj zvädnuté kvety počas celej sezóny až do prvých mrazov

Ostrihaj rastlinu a vyber hľuzy so zemou von, nechaj trošku preschnúť

Ulož v debničke s pieskom / zeminou / na tmavé vlhšie miesto do jari
